

SAP Technical Consultant

Murat Aydogdu

YEAR OF BIRTH: 1990

Current Location: Luxembourg

WORK EXPERIENCE

11/2021 – 02/2026 – Luxembourg

Senior SAP Consultant - 4Dev

SAP Full Stack Developer- SAP / Walldorf, Germany

Achievements and responsibilities: Designed and developed customer-facing and internal configuration applications for SAP Private Cloud as part of SAP ECS – Enterprise Cloud Services, built and operated on SAP BTP. Implemented backend services using SAP CAP and TypeScript, including custom cds plugins to extend and standardize shared functionality across services. Built modular SAPUI5 applications integrated via the Luigi framework to compose micro frontend-based user interfaces. Actively worked with BTP service configuration and bindings, integrating platform services such as Redis, hyperscaler-managed services, and common BTP services (notifications, user assistance, observability). Developed SAPUI5-based internal administrative UIs for managing Redis-backed configuration and feature data. Contributed across design, implementation, and CI/CD-driven delivery within an Agile setup, using Jira for end-to-end execution

Technologies used: SAPUI5, SAP CAP, SAP BTP, TypeScript, Effect Framework, Luigi, GitHub Enterprise, Jira, Node.JS

03/2021 – 09/2021 – Luxembourg

Senior SAP Consultant - 4Dev

SAP UI5 Developer - Deutsche Boerse/ Clearstream,
Luxembourg

Achievements and responsibilities: Mostly custom UI5 development for customer needs, UI5 component development for re-use across projects and maintaining custom libraries and components previously developed. Agile methodologies mostly used in the project and Jira was the main tool for the complete project organization.

Technologies used: SAPUI5, OData, SAP WebIDE, Github Enterprise, Git, Jira

01/2019 – 03/2021 – Riga, Latvia

Application Development Senior Analyst - Accenture

SAP CAP & UI5 Developer – SAP,
Walldorf – Germany

Achievements and responsibilities: Standard API development for SAP SE, using SAP CAP framework, OData v4 standard used as default and combined with REST protocol also Fiori Elements annotations to build UI and extending it where custom UI solution needed. Support on CI/CD configuration. SAP CP CloudFoundry environment being used to deploy applications, therefore authentication, roles and cFLP (Fiori Launchpad) configurations are handled on SAP CP.

Technologies used: VSCode, Node.js, SAP CAP, OData v4, REST, Github Enterprise, SAPUI5, OPA5, Karma, Jenkins, SonarQube, CloudFoundry, SAPCP, cfCLI
